MULTIMEDIA AUTHORING TOOLS

A simple and easy presentation

Create • Combine • Make it Interactive

Presented by: _____

1. What Are Multimedia Authoring Tools?

Multimedia authoring tools are **software programs** used to create multimedia projects.

They help us combine different types of media:

TEXT Words and titles	**IMAGES** Pictures and graphics	**AUDIO** Music and sound
VIDEO Moving pictures	**ANIMATION** Moving drawings	**INTERACTIVITY** Buttons and links

Easy example: A PowerPoint presentation with text, pictures, and videos.

2. Types of Multimedia Authoring Tools

1. Card-Based Tools
Information is arranged in cards or pages.
Example: HyperCard

2. Icon-Based Tools
Uses icons and flowcharts to organize content.
Example: Authorware

3. Time-Based Tools
Media plays according to a timeline.
Example: Adobe Animate

4. Page-Based Tools
Information is arranged into pages or slides.
Example: PowerPoint

Remember: each type arranges and combines media in a different way.

3. Examples of Authoring Tools

Microsoft PowerPoint	Creates presentations and slides.
Adobe Animate	Creates animations.
Adobe Captivate	Creates interactive learning materials.
Adobe Authorware	Used to build multimedia lessons.

The best-known everyday example is Microsoft PowerPoint.

4. Advantages
